

ABHISHEK PAL

React Native Mobile Engineer | 3.5+ Years | 4–5 Apps on Each Store | Enterprise & Kiosks | 100+ Production Updates (RN 0.70 → 0.8x)

Agra, India (Open to Remote / Relocation) • Notice Period: 30 Days (Negotiable) • abhipal85350@gmail.com • [+91-9870962636](tel:+91-9870962636) • linkedin.com/in/abhishek-pal-a5a497217 • github.com/abhipal-dev • abhipal-dev.github.io/portfolio

PROFESSIONAL SUMMARY

React Native Mobile Engineer with **3.5+ years of production experience** building, maintaining, and scaling high-performance cross-platform Android and iOS applications. Built and published **4–5 distinct production applications on each store** (Google Play Store and Apple App Store), as well as dedicated enterprise tablet kiosks and private fleet APKs, actively delivering **100+ continuous production updates**, component enhancements, and upgrading framework versions across **React Native 0.70 to 0.8x** with Gradle, CocoaPods, and Android targetSdkVersion compliance. Specialized in real-time GPS tracking, interactive map architectures, background location telemetry, geofencing, driver dispatch workflows, and push notification systems. Additionally experienced in **Web Development and advanced WebViews** with bidirectional data bridges (postMessage). Currently leading mobile engineering for a three-sided mobility platform comprising Rider, Driver, and Kiosk Terminal applications synchronized with central Web dispatch software.

KEY TECHNICAL SKILLS

- **Core Mobile & Multi-App Architectures:** React Native, JavaScript (ES6+), TypeScript, React Navigation, Multi-App Ecosystems (Rider, Driver, Kiosk), React.js (Web Development)
- **Maps, GPS & Mobility (Core Specialization):** React Native Maps, Google Maps Platform, Real-time GPS Tracking, Location Telemetry, Geofencing, Polyline Routes, ETA Calculation, Driver Dispatch & Proximity Matching, Walk-up Kiosk Workflows
- **WebViews & Data Bridges:** WebView Integration, Bidirectional WebView-to-App Communication (postMessage bridge), High-frequency Telemetry Sync, Native File Downloads & Local Document Storage
- **Push Notifications & Background Processing:** Firebase Cloud Messaging (FCM), APNs, Notiffee, Headless JS, Background Task Handlers, Notification-driven Deep Navigation
- **Storage & Offline Architecture:** MMKV Storage, SQLite, High-frequency Telemetry Caching, Offline Synchronization Strategies
- **UI, Animation & Localization:** UI Kitten, React Native Paper, React Native Reanimated, Responsive Layouts, Dynamic Arabic/English RTL and LTR Mirroring
- **Backend & Integrations:** RESTful APIs, Axios, Laravel/PHP APIs, MySQL, Redis, Web App Synchronization, Payment Gateways
- **Builds & Release Management:** Android Studio (Gradle), Xcode, Google Play Console, Apple App Store Connect, Production Artifacts (.aab/.ipa), Git

PROFESSIONAL EXPERIENCE

Softcruise Technology Pvt. Ltd. | Agra, India May 2024 – Present
Lead React Native Mobile Engineer (Core Focus)

- **Three-Sided Platform Ownership:** Lead end-to-end mobile engineering for production Android and iOS applications across fleet management, logistics, and multi-sided ride-hailing platforms (Rider, Driver, and Kiosk Terminal).
- **Architecture & Modularity:** Design clean, maintainable mobile architectures with reusable component hierarchies, centralized API service layers, and predictable state management.
- **Store Releases & Compliance:** Configure Android Gradle builds and iOS Xcode targets, generate signed release artifacts (.aab / .ipa), and manage submissions, testing tracks, and live releases on Google Play Store and Apple App Store.
- **Code Reviews & Mentorship:** Conduct regular peer code reviews, enforce coding standards, and mentor developers in debugging native crashes, state handling, and responsive styling.

Softcruise Technology Pvt. Ltd. | Agra, India Jan 2023 – May 2025
React Native & Web Developer (Lazyeye Healthcare Platform)

- **Dual Web & Mobile Development:** Engineered customized pediatric visual assessment platforms, working actively as both a Web Developer and React Native engineer.
- **High-Frequency WebView Data Communication:** Engineered secure bidirectional message bridges (postMessage & native event listeners) to exchange real-time exercise telemetry, canvas coordinates, and test scores between HTML5 web views and native React Native modules.
- **Native File Handling & Storage:** Built native download pipelines allowing doctors and parents to download clinical PDF assessment reports directly from WebViews to device storage for offline access.

KEY PROJECTS

1. Driver, Rider & Kiosk Mobility Ecosystem (Three-Sided Ride-Hailing Platform & Web Portal) Mar 2024 – Present

Project Lead, React Native

Tech: React Native, React Native Maps, Reanimated, FCM, Notifee, Axios, Laravel, Kiosk Terminal, Web Dispatch, RTL

- **Three-Sided Platform Architecture:** Lead mobile development across Rider App (on-demand booking & tracking), Driver App (trip requests, active navigation, and telemetry), and Kiosk Terminal App (dedicated tablet/kiosk stations for walk-up bookings at hotels, malls, and airports) — all synchronized with central Web Dispatch & Fleet Management software.
- **Kiosk Terminal Workflows:** Engineered dedicated tablet kiosk app supporting rapid walk-up ride bookings, automated nearby driver matching, thermal/digital receipts, and kiosk session security.
- **Interactive Map & Driver Tracking:** Built real-time map interfaces using react-native-maps with smooth animated driver marker movement, bearing rotation, and dynamic polyline route drawing powered by Reanimated.
- **Dispatch & Proximity Matching:** Implemented real-time GPS dispatch matching incoming requests with eligible nearby drivers based on distance radius waves, vehicle category, and active status.
- **Complete Ride Lifecycle:** pickup/drop selection → fare calculation & estimate → dispatching → driver acceptance → driver arrival → start ride with OTP → in-transit navigation → ride completion & rating.
- **Fare Engine & Promo Caps:** Integrated multi-tier fare calculation (base, distance, time, wait, surge) and client-side promo code validation.
- **Reliable Notifications & RTL:** Configured FCM, APNs, and Notifee for high-priority trip alerts across foreground, background, and killed app states. Built dynamic English and Arabic multi-language support with comprehensive RTL and LTR mirroring.

2. TrackingHAWK X3 — Enterprise Fleet Management & GPS Telemetry Jan 2023 – Present

React Native Developer

Tech: React Native, Google Maps, SQLite, MMKV, FCM, Background Handlers, Barcode Scanning

- **Flagship App Ownership:** Built and independently maintained enterprise fleet-tracking application for Android and iOS across multiple major production releases.
- **Real-Time Vehicle Tracking:** Engineered live GPS vehicle tracking on maps, displaying vehicle speed, ignition status, historical route playback, and geofence boundary crossing alerts.
- **Offline Caching & Persistence:** Implemented SQLite and MMKV for sub-millisecond local caching of telemetry, enabling rapid app launch and offline inspection of historical vehicle reports.
- **Background Telemetry Alerts:** Configured background notification handlers alerting fleet managers to speed violations, geofence breaches, and ignition changes when the app is minimized or closed.
- **Asset Check-In Workflows:** Integrated camera and hardware barcode/QR scanning modules for automated driver-vehicle pairing and physical inventory audits.

3. Lazyeye — Customized Child Assessment & Progress Platform Jan 2023 – May 2025

React Native & Web Developer

Tech: React Native, WebViews, Bidirectional postMessage Bridge, Web Development, Native File Downloads

- **Customized Child Workflows:** Developed customized web canvas exercises and React Native mobile applications featuring interactive visual activities and clinical progress tracking.
- **WebView-to-App Communication:** Implemented WebView modules with a secure bidirectional message bridge (postMessage) to exchange real-time exercise telemetry and assessment scores between the web canvas and native application.
- **Native File Downloads:** Engineered file download workflows allowing doctors and guardians to download PDF clinical assessment reports directly from WebViews to device storage for offline access.

- **Practitioner Summaries:** Built user workflows for doctors and parents to review daily usage quotas, session logs, and configurable exercise parameters.

4. Ingecom GPS & Japjee (Client Mobility & Inventory Applications)

Jan 2024 – Present

React Native Developer

- **Ingecom GPS:** Customized and deployed white-labeled client instances of the fleet tracking platform for international clients, incorporating custom branding, reporting widgets, and payment integration.
- **Japjee Inventory:** Independently developed cross-platform inventory management mobile application with Role-Based Access Control (RBAC), real-time order tracking, and barcode scanning for warehouse workflows.

EDUCATION

Master of Computer Applications (MCA)	2021 – 2023
Hindustan Institute of Management and Computer Science, Mathura	
Bachelor of Computer Applications (BCA)	2018 – 2021
Uttam Institute of Technology and Management, Agra
