PROFESSIONAL SUMMARY

React Native Mobile Engineer with **3.5+ years of production experience** building, maintaining, and scaling high-performance cross-platform Android and iOS applications. Built and published **4–5 distinct production applications on each store** (Google Play Store & Apple App Store), as well as purpose-built enterprise tablet kiosks and internal fleet APKs, delivering **100+ continuous production updates**, component enhancements, and framework migrations across **React Native 0.70 to 0.8x** with Gradle, CocoaPods, and targetSdkVersion 34/35 compliance. Specialized in real-time GPS tracking, interactive map architectures, background location telemetry, geofencing, driver dispatch workflows, push notification systems, and bidirectional WebView data bridges (postMessage). Currently leading mobile engineering for a three-sided mobility platform comprising Rider, Driver, and Kiosk Terminal applications synchronized with central Web dispatch software.

KEY TECHNICAL SKILLS

- **Core Mobile & Multi-App Architectures:** React Native (RN 0.70 ➔ 0.8x), JavaScript (ES6+), TypeScript, React.js, React Navigation, Multi-App Ecosystems (Rider, Driver, Kiosk)
- **Maps, GPS & Mobility (Core Specialization):** React Native Maps, Google Maps Platform, Real-time GPS Tracking, Location Telemetry, Geofencing, Polyline Routes, ETA Calculation, Driver Dispatch & Proximity Matching, Walk-up Kiosk Workflows
- **Push Notifications & Background Processing:** Firebase Cloud Messaging (FCM), APNs, Notifee, Headless JS, Background Task Handlers, Notification-driven Deep Navigation
- **WebViews & File Handling:** WebView Integration, Bidirectional WebView-to-App Communication (postMessage bridge), Native File Downloads & Local Document Storage
- **Storage & Offline Architecture:** MMKV Storage, SQLite, High-frequency Telemetry Caching, Offline Synchronization Strategies
- **UI, Animation & Localization:** UI Kitten, React Native Paper, React Native Reanimated, Responsive Layouts, Dynamic Arabic/English RTL and LTR Mirroring
- **Backend & Integrations:** RESTful APIs, Axios, Laravel/PHP APIs, MySQL, Redis, Web App Synchronization, Payment Gateways
- **Builds & Release Management:** Android Studio (Gradle), Xcode, Google Play Console, Apple App Store Connect, Production Artifacts (.aab/.ipa), Enterprise APK & Kiosk Deployments, Git

PROFESSIONAL EXPERIENCE

Softcruise Technology Pvt. Ltd. | Agra, India

Jan 2023 – Present

Lead React Native Mobile Engineer (Promoted / Core Focus)

- **Full-Lifecycle Ownership:** Lead, develop, test, and maintain production React Native mobile applications for Android and iOS across fleet management, logistics, and multi-sided ride-hailing platforms.
- **Architecture & Modularity:** Design clean, maintainable mobile architectures with reusable component hierarchies, centralized API service layers, and predictable state management across multi-app ecosystems.
- **Cross-Functional Delivery:** Collaborate closely with backend engineers, web platform developers, UI/UX designers, and QA teams to define API payloads, refine interactive user flows, and eliminate platform bottlenecks.
- **Store Releases & Compliance:** Configure Android Gradle builds and iOS Xcode targets, generate signed release artifacts (.aab / .ipa), and manage submissions, testing tracks, and live releases for 4–5 production apps each on Google Play Store and Apple App Store across 100+ updates.
- **Code Reviews & Mentorship:** Conduct regular peer code reviews, enforce coding standards, and mentor junior developers in debugging native crashes, state handling, and responsive styling.

KEY PROJECTS

1. Driver, Rider & Kiosk Mobility Ecosystem (Three-Sided Ride-Hailing Platform & Web Portal)

Project Lead, React Native | Mar 2024 – Present ***(Tech: React Native, React Native Maps, Reanimated, FCM, Notifee, Axios, Laravel, Kiosk Terminal, Web Dispatch, RTL)***

- **Three-Sided Platform Architecture:** Lead mobile development across the complete three-sided mobility platform — Rider App (on-demand booking & tracking), Driver App (trip requests, active navigation, and telemetry), and Kiosk Terminal App (dedicated tablet/kiosk stations for walk-up bookings at hotels, malls, and airports) — all synchronized with central Web Dispatch & Fleet Management software.
- **Kiosk Terminal Workflows:** Engineered the Kiosk Terminal application tailored for tablet kiosks and counter operators, supporting rapid walk-up ride creation, automated driver matching, thermal/digital receipts, and kiosk session security.
- **Interactive Map & Driver Tracking:** Built real-time map interfaces across rider and driver apps using react-native-maps with smooth animated driver marker movement, bearing rotation, and dynamic polyline route drawing powered by React Native Reanimated.
- **Dispatch & Proximity Matching:** Implemented real-time GPS dispatch workflows matching incoming rider and kiosk requests with eligible nearby drivers based on distance radius waves, vehicle category, and active status.
- **Complete Ride Lifecycle:** Engineered the end-to-end trip state machine: pickup/drop selection → fare calculation & estimate → dispatching → driver acceptance → driver arrival → start ride with OTP → in-transit navigation → ride completion & rating.

- **Fare Engine & Promo Caps:** Integrated multi-tier fare calculation (base fare, distance, time, wait time, peak surge) and client-side promo code validation, handling percentage/fixed discounts, eligibility thresholds, global usage caps, and per-user limits.
- **Notification Delivery Across All App States:** Configured FCM, APNs, and Notifee to reliably deliver high-priority trip alerts and sound notifications across foreground, background, and killed application states.
- **MENA Localization & RTL:** Built dynamic English and Arabic multi-language support with comprehensive Right-to-Left (RTL) and Left-to-Right (LTR) layout mirroring across all screens and interactive sheets.

2. TrackingHAWK X3 — Enterprise Fleet Management & GPS Telemetry

React Native Developer | Jan 2023 – Present ***(Tech: React Native, Google Maps, SQLite, MMKV, FCM, Background Handlers, Barcode)***

- **Flagship App Ownership:** Built and independently maintained the company's enterprise fleet-tracking application for Android and iOS across multiple major production releases.
- **Real-Time Vehicle Tracking:** Engineered live GPS vehicle tracking on maps, displaying real-time vehicle speed, ignition status, historical route playback, and geofence boundary crossing alerts.
- **Offline Caching & Persistence:** Implemented SQLite and MMKV storage for sub-millisecond local caching of vehicle telemetry, enabling rapid app launch and offline inspection of historical vehicle reports.
- **Background Telemetry Alerts:** Configured background notification handlers to alert fleet managers to critical vehicle events (speed violations, geofence breaches, ignition changes) when the application is minimized or closed.
- **Asset Check-In Workflows:** Integrated camera and hardware barcode/QR scanning modules for automated driver-vehicle pairing and physical vehicle inventory audits.
- **In-App Document Handling:** Implemented in-app reporting through customized WebViews with local caching, allowing drivers and managers to access reports even in poor network environments.

3. LazyEye — Digital Dichoptic Vision Therapy & Clinical Assessment Mobile Platform

React Native Mobile Engineer & Full-Stack Developer | Jan 2023 – Present ***(Tech: Bare React Native 0.87.1 CLI, React 19, MMKV Storage, HTML5 Canvas WebViews, postMessage, Laravel API, Android API 37)***

`Live Platform: https://lazyeye.onrender.com | Test: Doctor (dr_sarah / doctor123), Patient (abhicoder / 4567), Admin (admin / admin123)`

- **Production React Native 0.87.1 App:** Engineered cross-platform mobile application targeting modern Android API 37 (Android 15+) and iOS, resolving AGP 9.2 / Gradle 9.4 native toolchain requirements with React 19.
- **11 Clinical Vision Engines & Gestures:** Built 11 responsive HTML5 canvas vision engines (Tetris, Snake, Menja 3D, Bubble Shooter, Ping-Pong, Maze, etc.) with touch gesture pass-through, edge-to-edge safe area scaling, and red-cyan anaglyph calibration.
- **Dual Engine & MMKV Storage:** Built instant switcher between offline local HTML5 canvas engines and live Render cloud portal, backed by a zero-latency synchronous MMKV storage layer (`mmkvStorage`) and reactive settings handler.
- **Custom Animated Bottom Tab Bar:** Designed tactile floating bottom tab bar with liquid sliding pill indicators, Apple-like spring physics (`Animated.spring`), touch jelly squish, and active jewel micro-dots.
- **Real SQLite Data & 84-Day Heatmap:** Integrated authentic database records (13 real users, 593 gameplay sessions), dynamic daily dosage calculation, streak counter, and an interactive 84-day (12-week) therapy compliance heatmap.
- **Bidirectional WebView Telemetry & PDF Reports:** Implemented secure `postMessage` bridge for real-time exercise score sync and native download pipeline for clinical PDF assessment reports.

4. Ingecom GPS & Japjee (Client Mobility & Inventory Applications)

React Native Developer | Jan 2024 – Present

- **Ingecom GPS:** Customized and deployed white-labeled client instances of the fleet tracking platform for international clients, incorporating custom branding, reporting widgets, and payment integration.
- **Japjee Inventory:** Independently developed a cross-platform inventory management application with Role-Based Access Control (RBAC), real-time order tracking, and barcode scanning for warehouse workflows.

EDUCATION

Master of Computer Applications (MCA) | 2021 – 2023
Hindustan Institute of Management and Computer Science, Mathura

Bachelor of Computer Applications (BCA) | 2018 – 2021
Uttam Institute of Technology and Management, Agra
